

Manage Automation

Machine and process automation

Data and asset management

Green technology and anomaly detection

www.cedas.dk

Solutions we offer:

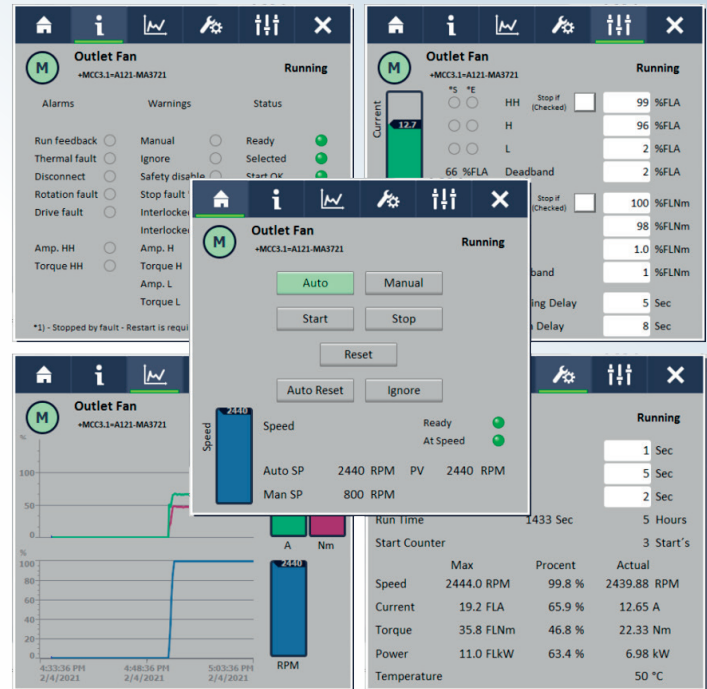

Process optimization, automation solutions, control systems, data collection and analysis, and anomaly detection.

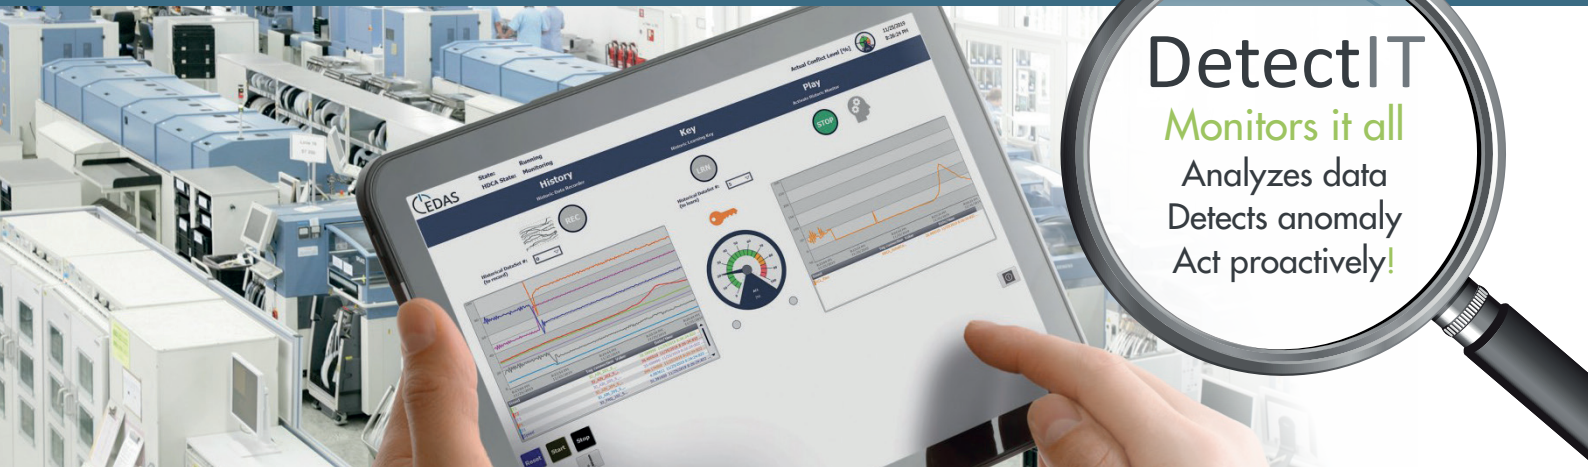

Automation:

Cedas develop complete solutions within SCADA, HMI, and PLC systems. We go with you all the way, from idea to full commissioning. With more than 25 years of experience and expertise no task is too big or too small.

- Characteristics:
- User friendly interface
 - Quick troubleshooting
 - Solid documentation
 - Simple structure
 - Innovative design

DetectIT

Monitors it all

Analyzes data

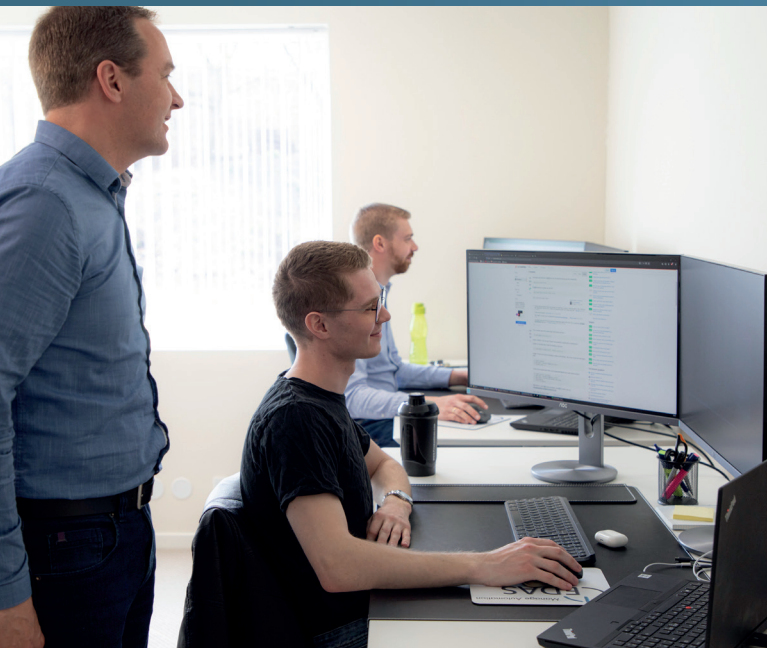

Detects anomaly

Act proactively!

Asset Management:

Get value back from data. To assist data driven asset management in the industry, we offer a technology solution, that detects anomaly to optimize production, avoid downtime and use condition-based maintenance. We can give you valuable, actionable insights, for you to act proactively and keep production up and running.

Vision:

To create green user-friendly technology solutions within automation and digitization.

Customer Quote:

"Cedas has been a great help in the development of new controls of our products. Cedas was at our side all the way in the process and ensured a successful handover. Cedas is a very professional business partner that we highly recommend"

Per Niebuhr, Head of Project Management, SENIUS

About Cedas:

We are an experienced and dedicated team of interdisciplinary people. Based on our values, integrity, quality, knowledge, and balance, we are concerned with securing valuable solutions for our customers.
